

Course Name	3D ANIMATION (SC)																								
Course Overview	This course covers the fundamentals of 3D character animation workflow for high quality animation output. Participants will learn about the process and also elements of 3D character animation which includes animation design, acting & acting reference, animation workflow and basic 3D animation software.																								
Course Objective	<p>After completing this course, participants will be able to:</p> <ul style="list-style-type: none"> • Describe the complete workflow for creating 3D animation from storyboard, animation design, acting, acting reference, blocking, rough animation, final animation & rendering. • Perform acting reference, blocking and refining 3D animation for high quality output. • Apply effective animation workflow for high quality output & good time management. • Produce high quality 3D character animation & show reel. 																								
Target Audience	The course is opened for participants who are interested in 3D animation. And highly recommended to participants with 3D modelling knowledge and background.

Topic 1:	INTRODUCTION TO 3D ANIMATION																								
Topic 2:	3D CHARACTER ANIMATION WORKFLOW																								
Topic 3:	3D ANIMATION SOFTWARE: INTRODUCTION TO AUTODESK MAYA																								
Topic 4:	3D CHARACTER RIGGING: FUNDAMENTALS																								
Topic 5:	ANIMATION DESIGN																								
Topic 6:	12 PRINCIPLES OF ANIMATION																								
Topic 7:	ACTING FOR ANIMATION																								
Topic 8:	ACTING REFERENCE																								
Topic 9:	PHRASING																								
Topic 10:	BLOCKING, ROUGH ANIMATION & POLISHED ANIMATION																								
Topic 11:	FINAL RENDERING																								
Topic 12:	CREATING SHOW REEL																								
Duration	2 Days
