

NAME OF PROGRAMME

Diploma In Animation

DESCRIPTION

This programme is designed to equip students with skills in animation. Digital Animation is widely applied in production of films, videos, advertising architectural visualization, and special effects and in the creation of educational material. Thus, graduates of this programme have a wide range of options in terms of industries to choose from to start off their careers. Students learn both theoretical and fundamentals of drawing and computer technology used in animation. The aesthetical and creative elements of animation are covered through traditional animation techniques and computer technologies. Storyboarding skills, scripting for animation, timing, layout design are incorporated into the programme. Two major projects will test the students' competence in animation skills and techniques.

CAREER OPPORTUNITIES FOR STUDENTS

- Animator
- Layout Designer
- Video Game Designers
- Images Editing Designers
- 3D Designers and Animators
- Video Directors
- Video Editors
- Video Producers
