

Course Name	PHP Programming (SC)														
Course Overview	<p>This hand on PHP Programming course provides the knowledge necessary to design and develop dynamic and database-driven web pages using PHP. PHP is a language written for the web, quick to learn, easy to deploy and provides substantial functionality required for web development. This course introduces the PHP framework and syntax, and covers in depth the most important techniques used to build dynamic web sites.</p> <p>The training will be conducted by Miss Nurulhuda Ismail, a technical consultant (freelance) on Android development, Java SE Programming and PHP scripting, Refer CV as attached for detail information.</p>														
Course Objective	<p>The objective of the training is to equip lecturers with essential knowledge and skills in PHP programming. The participants will learn the basics of PHP (including variables, logical expressions, loops, and functions), understand how to connect PHP to a MySQL database, and gain experience developing a complete web application.</p>														
Course Outline	<table border="1"> <thead> <tr> <th>Day</th> <th>Date</th> <th>Programme</th> </tr> </thead> <tbody> <tr> <td>Day 1</td> <td>14/11/2016</td> <td> Topic cover: <ol style="list-style-type: none"> 1. Introduction to PHP 2. Programming with PHP 3. Creating Dynamic Websites </td> </tr> <tr> <td>Day 2</td> <td>15/11/2016</td> <td> <ol style="list-style-type: none"> 4. Introduction to SQL and MySQL 5. Advanced SQL and MySQL 6. Using PHP and MySQL </td> </tr> <tr> <td>Day 3</td> <td>16/11/2016</td> <td> <ol style="list-style-type: none"> 7. Cookies and Sessions 8. Security 9. Web application development & commerce </td> </tr> </tbody> </table>			Day	Date	Programme	Day 1	14/11/2016	Topic cover: <ol style="list-style-type: none"> 1. Introduction to PHP 2.
